

# ANSP HIGH-LEVEL SAFETY COMMITTEE (COSEGO) 'BEST' PRACTICE

## Monitoring COSEGO – Safety Committee

Safety within an ANSP's jurisdiction is the responsibility of the CEO and Board. To that end, ENAIRe implements a high-level Safety Committee (COSEGO), composed of the members of the Board of Directors, that meets fortnightly so that the Board is fully aware and involved in the company's critical safety strengths and weaknesses.

## COSEGO - chaired by ENAIRe's General Director

- Safety, Quality & Environment Division
- Safety Division
- People Directorate
- Business Development Directorate
- Cabinet of General Directorate Division
- Certification and Inspection Unit
- Air Navigation Services Directorate
- Systems Directorate
- Network Directorate
- Operations Directorate
- Regional Directorates

In order to identify and address the systemic issues we need to do a risk assessment of these occurrences...

## A FORTNIGHTLY MEETING

# FUNCTIONS

Safety Culture promotion at the highest level within the organization.

Definition of actions for safety improvement, to be included in the Safety Plan.

Strategic decision-making based on safety information.

Follow-up of the Safety Plan actions.

Monitoring and follow-up of ENAIREs safety performance.

Monitoring and management of commitments with the Spanish NSA – AESA.

Presentation, management and tracking of high severity safety occurrences and derived mitigation measures.

Preparation and follow-up of safety assessments associated to relevant changes in the ANS.

We drilled down..., and drilled down again, ... and again: any pattern?... in the end we found out that we are dealing with statistically rare events... let's establish the actions!
