- From what you have seen today what is the
  - Easiest KPI/metric to deploy
  - Most difficult KPI/metric to deployand at what level (local, FAB or Network) ?
- Can we still accommodate safety improvements with the costs required to go down?
- How can we use ETTO in a smart way in ATM ?
- What is your view on targets ? How we can work with myriads of indicators ? How to select those that really drive improvements and “motivation” ?
- What will be the first 3 actions that your organization will take on Performance indicators and targets ?
- What we collectively do together to drive improvements and achieve the goals of RP1 and RP2
