ES² SAF tools workshop – 25-27 April, ROMATSA HQ, Bucharest

Data visualization / BI

- Enhanced RAT stats: display barrier link with contributing factors, graph showing SMIs per barrier & drill down

General

- Detection of duplicate records (reports) that are one occurrence in Data Gathering and ATS Notification.
- Geographical coordinates / location map picker

Webservice

- Simple method to extract data

Network Manager
nominated by
the European Commission

ASMT vs ATM Safety Performance

Templates

- Simpler notification forms (i.e. single page forms)
- Improved notification interface (without taxonomy tree visible)

Network Manager
nominated by
the European Commission

ASMT vs ATM Safety Performance

Workflow

- Include additional alerts: remind ATCO to submit the notification after saving it, remind ATCO to log in the event

Feedback / Safety Recommendations

- Facility to give feedback inside eTOKAI
- Track recommendations in eTOKAI

Network Manager
nominated by
the European Commission

ASMT vs ATM Safety Performance

- Integration with eTokai to:
 - Measure the level of reporting in total and per unit
 - Import data to make statistics on RI per number of movements
- Put back in the replay the window with aircraft positions

- Relate recommendations to safety index
- Create dashboard templates
