## About the day

Start to end	Oct 27, 2020 15:39 - Oct 27, 2020 16:24
Nr. of active attendees	153
Nr. of responses	1,051

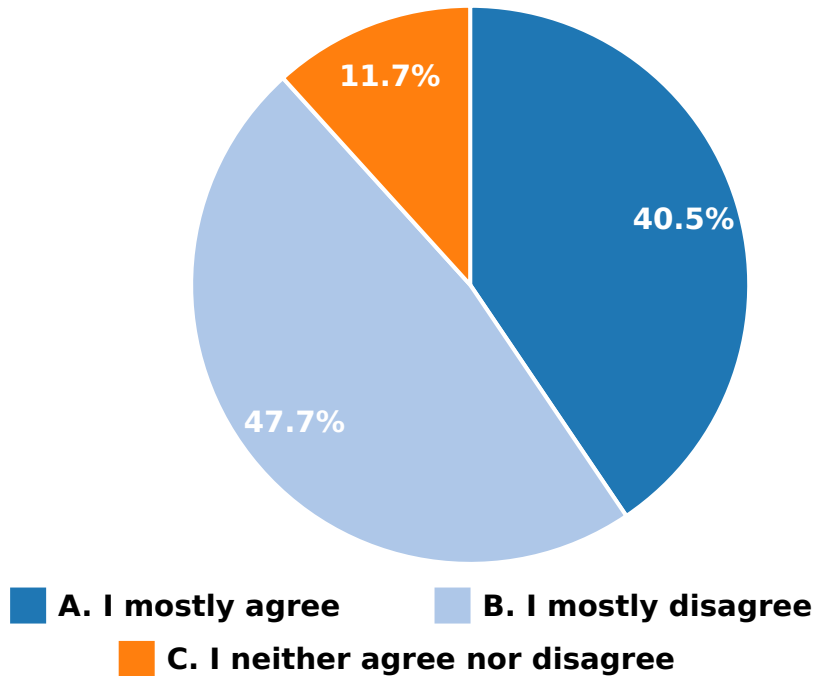

The Same Behaviour Or Decision, With The Same Underlying Knowledge And Skills, Should Be Judged More Harshly When The Outcome Is More Severe, Even Where The Outcome Is Influenced By Factors Outside Of The Person's Control.

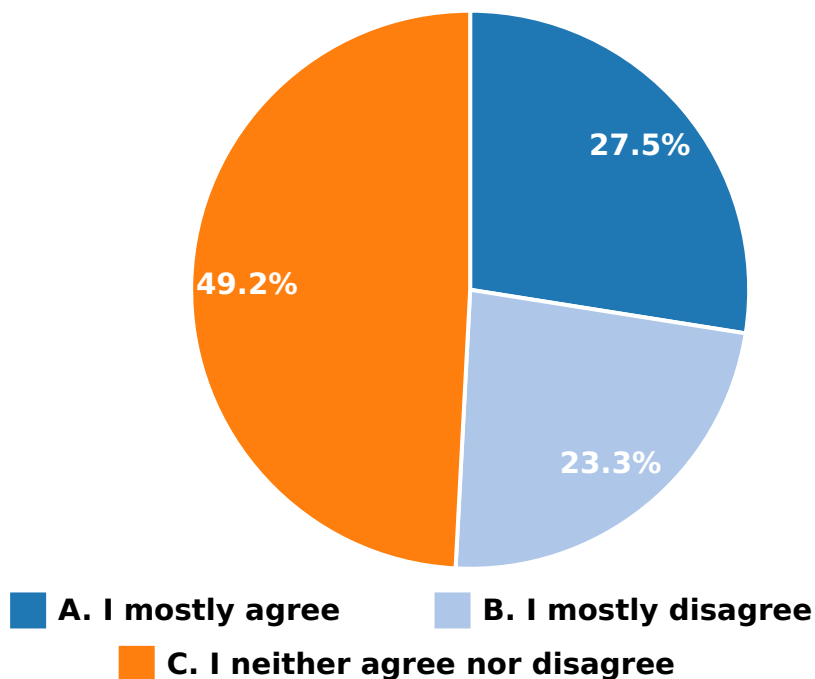

Harmful Actions Are Worse Than Equally Harmful Omissions.

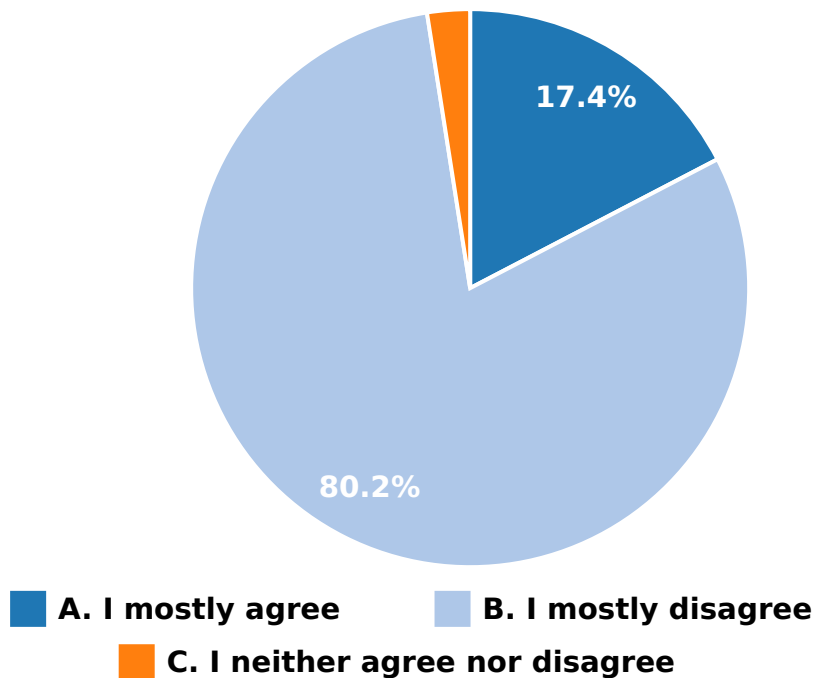

Given The Same Training And Information About A Case, Others Would Interpret Information In The Same Way And Make Approximately The Same Judgements.

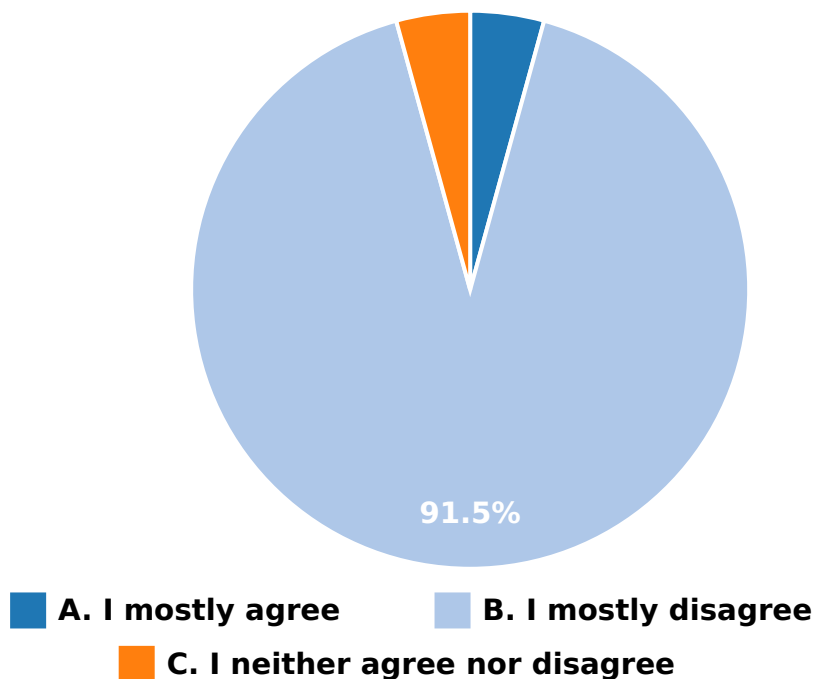

Compared To Others In My Profession, My Judgements Are Better Than Average.

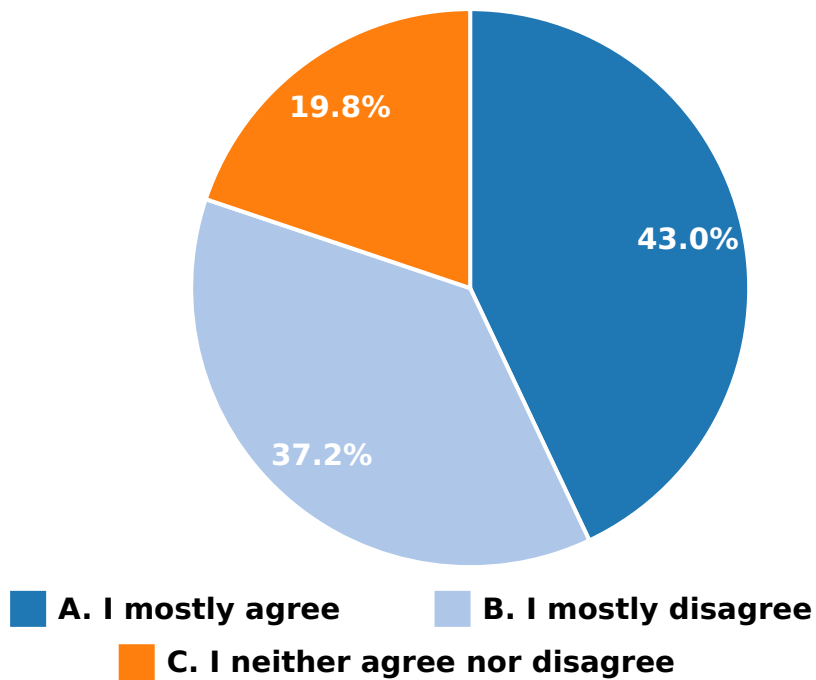

Repeating A Statement Multiple Times Has No Effect On Whether People Believe It Is Truthful.

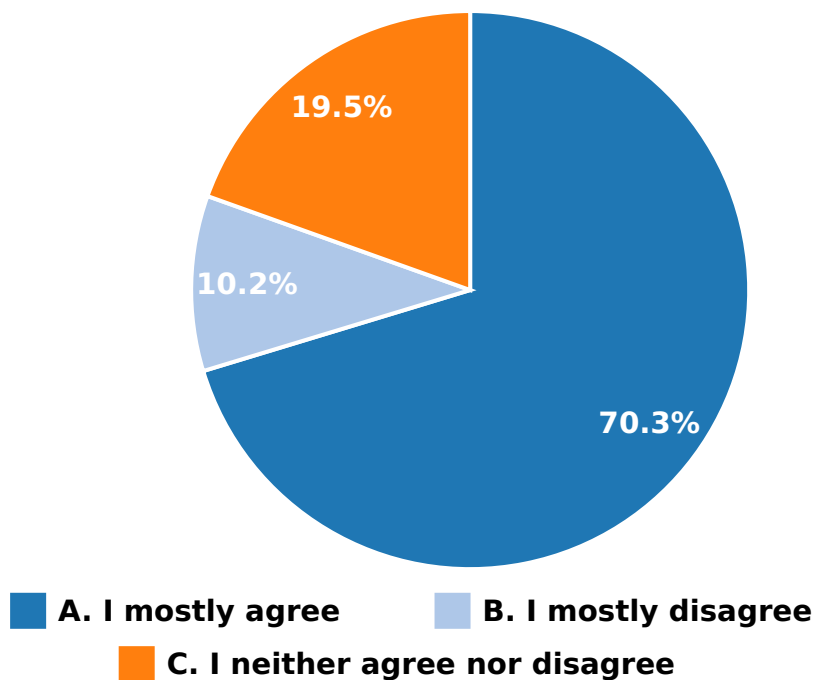

Framing The Same Information Positively (E.g., 1 In 10 Chance Of Winning) Or Negatively (E.g., 9 In 10 Chance Of Losing) Has No Effect On People's Judgement.

When Presented With New Evidence, Others Revise Their Beliefs Accordingly.

When Presented With New Evidence, I Revise My Beliefs Accordingly.

I Perform Better Than My Average Most Of The Time.
