

## APPENDIX:

# ATCC BUILDING FHA

### 1 INTRODUCTION

This appendix provides a basis for an ATCC Building FHA to be assessed for its suitability for a specific project.

The document provides guidance material for identifying Safety Objectives for an ATCC Building.

These Safety Objectives are set applying EATMP SAM – FHA methodology.

This Guidance Material does not specify any specific operational environment and consequently defining the specific Operational Environment in which this ATCC Building operates is a pre-requisite allowing either:

- customising some Safety Objectives (quantification) or
- delete not applicable hazards or
- add new hazards or
- modify the effects on ATCC and ATM or
- modify the worst credible effect severity..
