

"We now have a solution for the blackout,
But we need to adjust sector capacity due to the
controllers' physical condition..."

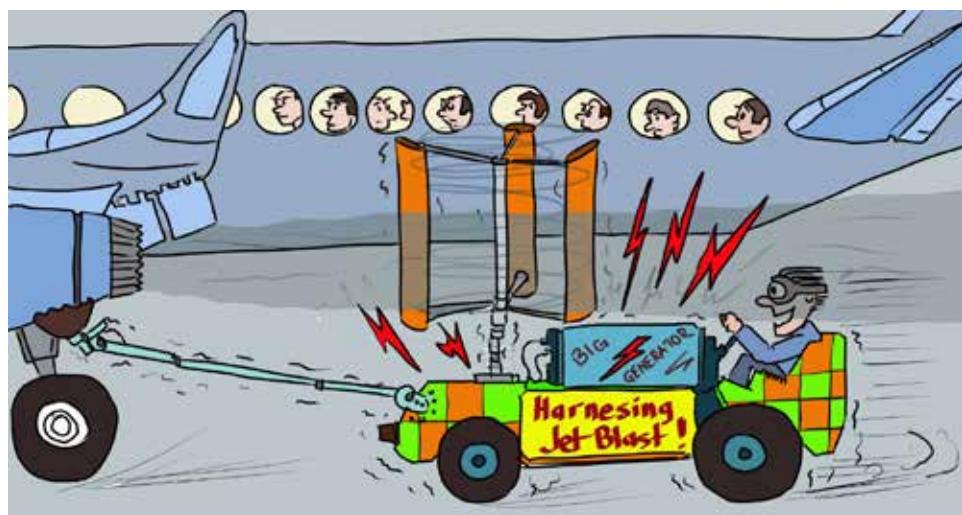

"Security, please find out who left
the window open again!"

"Let me introduce the new complexity reduction
expert!"

The outsourced software included
some surprising features.

Our new concept: Follow You Car!
We generate green energy from otherwise wasted jet blast!

"Sorry BigJet 123! VASIS is out due to energy restrictions. But fortunately we have our neighbours decorations to help you land..."

The new pandemic masks came in useful in the end...

"Should we tell them it's just a high-fidelity simulation?"

The new tsunami alarm was a surprise to everyone in the Alps...
