# SMART DESIGN: SMS MATURITY AND FOCUSING ON THE FRONTLINE

**Kim Nichols**

General Manager Safety & Assurance – Airways NZ

5 November 2024

AIRWAYS

## KEY CONSIDERATIONS

- ▶ KNOW YOUR OPERATIONS AND YOUR PEOPLE WORKING WITHIN IT
- ▶ THE FIVE PRINCIPLES OF SMS DESIGN-MATURITY
- ▶ THE THREE LINES OF DEFENCE
- ▶ PSYCHOLOGICAL SAFETY and *BETTER WORK* BY DESIGN
- ▶ SAFETY CULTURE
- ▶ JUST CULTURE
- ▶ MATURITY MODELS and KEY ARTEFACTS
- ▶ LEADERSHIP and ORGANISATIONAL CULTURE

# OPERATIONS AND PEOPLE

SITE VISITS

A DAY IN THE LIFE

UNDERSTAND REPORTING

SITTING IN ON MEETINGS

WORK AS IMAGINED VS WORK AS DONE

COMMUNICATION

LEADING WITH HUMILITY & EMPATHY

**AIRWAYS**

## THE FIVE PRINCIPLES FOR SMS-DESIGN-MATURITY

Civil Aviation Rule part accountability rests with **The Senior Persons**

The business is responsible for **safe practices and delivery of safe outcomes.**

**One** Airways SMS,  
**One** Airways Risk Evaluation Framework  
**One** Incident Reporting System

**Appropriate resourcing** needs to be across all areas

**Working collaboratively** to deliver the Airways strategy safety system enhancement initiative, via support and enablement.

**AIRWAYS**

## THREE LINES OF DEFENCE

Reviews, Investigations and Audits are all essential components of Airways' safety assurance framework. These three functions make up Airways' Three Lines model.

First Line  
**OWNERSHIP AND  
ACCOUNTABILITY**

Second Line  
**COMPLIANCE AND  
MONITORING**

Third Line  
**INDEPENDENT  
ASSURANCE**

# PSYCHOLOGICAL SAFETY RISKS

## OBLIGATIONS

Use these approaches to prevent harm

### PROTECT

Identify risks to mental health and wellbeing. Eliminate or minimise at source where practicable.

### SUPPORT

Provide access to appropriate workplace and clinical support.

## OPPORTUNITIES

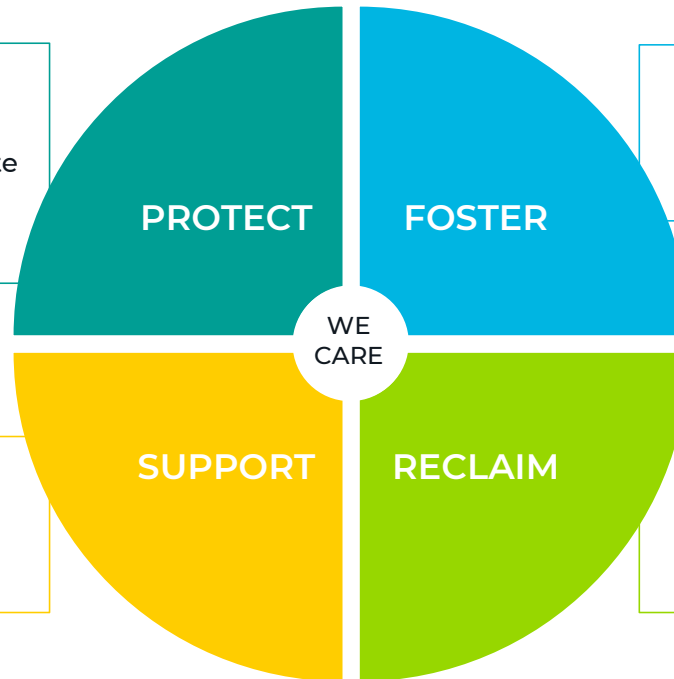

Use these approaches to help people thrive

### FOSTER

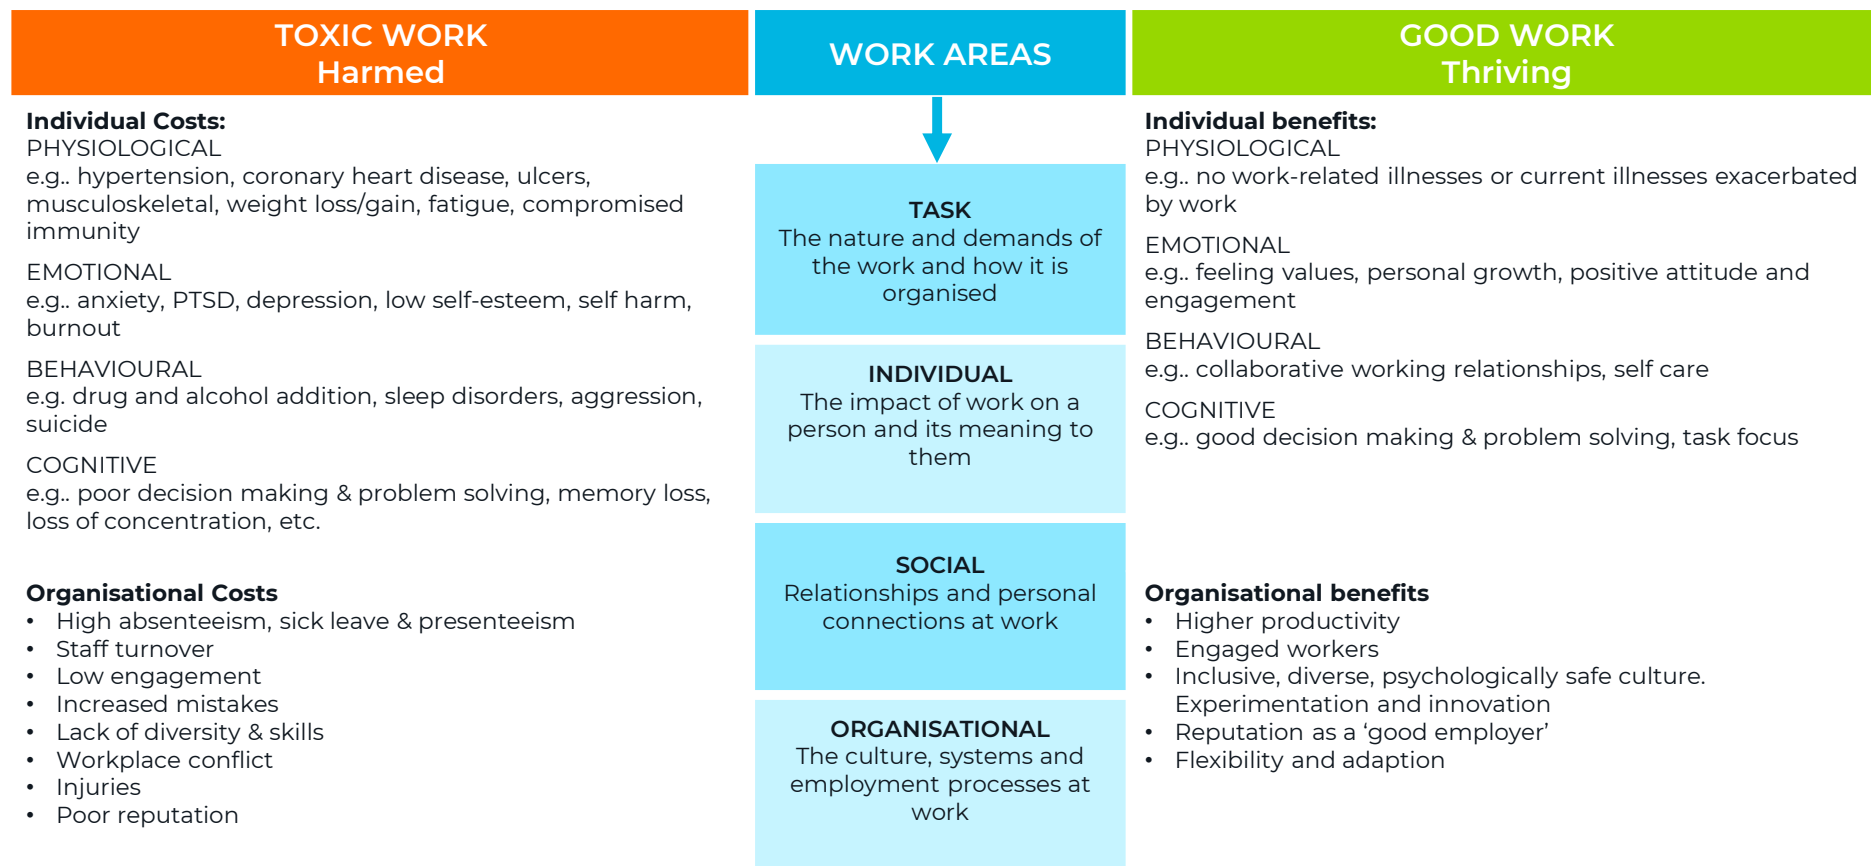

Develop the mental health and wellbeing of individuals and teams

### RECLAIM

Restore the mental health and wellbeing of individuals and teams

# BETTER WORK BY DESIGN

# SAFETY CULTURE

3 ½ year programme

5 Phases | 2 surveys | 3 reports

29 recommendations with 67 actions across 3 key areas of focus:

1. Optimising safety leadership persona
2. Optimising subject matter expertise
3. Solidifying, enhancing and expanding the corporate safety net

AIRWAYS

## JUST CULTURE PRINCIPLES

1 We **embrace** opportunities to learn

2 We make it easy to **do the right thing**

3 We all feel empowered to **speak up**

4 We all take **accountability** for our actions

AIRWAYS

# JUST CULTURE

OUR CHOICES, ACTIONS AND BEHAVIOURS			
GOOD CHOICES	HUMAN ERROR	AT-RISK BEHAVIOUR	RECKLES BEHAVIOUR
<p>Result of good system design and good choices.</p> <p>Manage through:</p> <ul style="list-style-type: none"> <li>• positive reinforcement</li> <li>• recognition</li> <li>• learning from what went well.</li> </ul>	<p>Inadvertent actions: slip, lapse, mistake</p> <p>Manage through:</p> <ul style="list-style-type: none"> <li>• creating awareness</li> <li>• better system or work environment design</li> <li>• processes and procedures.</li> </ul>	<p>A conscious chose to act outside of what is required</p> <p>Manage through:</p> <ul style="list-style-type: none"> <li>• better system or work environment design</li> <li>• processes and procedures</li> <li>• education and training</li> <li>• increasing situational awareness</li> <li>• monitoring.</li> </ul>	<p>Conscious and /or premeditated disregard of substantial risk</p> <p>Manage through:</p> <ul style="list-style-type: none"> <li>• remedial action</li> <li>• disciplinary processes</li> </ul>

# MATURITY MODELS AND KEY ARTEFACTS

[CANSO-Safety-Standard-of-Excellence-Safety-Management-Systems-2023.pdf](#)

**RISK & HAZARD IDENTIFICATION**

**Hazard (threat):** the source of a risk.

**Risk:** event / incident that would impact Airways business outcomes / objectives.

**Controls (mitigations):** a method to reduce / manage risk level.

**RISK ASSESSMENT**

Risks are an inevitable part of aviation activities however, risk manifestation and possible adverse consequences are possible if mitigation strategies are not conducted.

**Action:** Conduct hazard identification & risk assessment.

- Identify affected stakeholders, determine what they know, how best to collaborate with them, and understand their objectives.
- Generate a list of hazards. This list will provide a structured approach to the

**RISK CONTROLS & MITIGATION**

Risk management requires the identification of controls, identification of affected stakeholders, and a clear understanding of business objectives.

**CONTROL EFFECTIVENESS**

The application of risk controls should be balanced against the time, cost and difficulty of taking action to reduce or eliminate the risk. This concept is referred to as As Low As Reasonably Practicable (ALARP).

**Action:** Identify existing controls and their effectiveness level using the table below. Strengthen to the highest reasonable control level, noting that ALARP may prevent the achievement of absolute control effectiveness.

Totally Ineffective	Largely Ineffective	Partially Effective	Substantially Effective	Fully Effective
Controls do not exist or are defective	Control design is defective or not operating effectively	Control is partly functional (minimum level for compliance)	Control is adequately designed and operating effectively	Control is well designed and operating effectively
Significant control development is required	Major work to be done to strengthen controls	More to be done to strengthen controls	Some work to be done to strengthen controls	Monitoring of control effectiveness

**RISK LEVEL**

**Action:** To determine initial and residual risk, apply the identified risk consequence and likelihood to the risk matrix below.

**COMPONENT 1 – SAFETY POLICY AND OBJECTIVES**

**Element 1 - Safety policy and accountability**

**Safety policy and goals**

**Acceptable means of compliance**

There is a safety policy endorsed by the CEO and communicated to all personnel.

The CEO and the senior management team promote and demonstrate their commitment to the safety policy through active and visible participation in the system for safety management.

[Advisory Circular 100-1 Safety Management - Revision 3 \(aviation.govt.nz\)](#)

## KEY FOR FRONT LINE STAFF WHEN DESIGNING SMS INTEGRATION

- ▶ UNDERSTANDING OPERATIONS and PEOPLE
- ▶ WIFM/WALK IN THEIR SHOES
- ▶ SIMPLIFICATION
- ▶ EMBEDDING SME's
- ▶ REPORTING AND RESPONSE PROTOCOLS
- ▶ LEADERSHIP
- ▶ COMMUNICATION
